Coronavirus Cleaning & Decontamination of Buildings

Are you concerned that customers or any of your staff may be at risk of infection from Coronavirus on your premises? SMS Environmental has the expertise, and certified approach that will help. We can deep clean any property to minimise the chance of coronavirus contamination and get your premises back to being safe for use as soon as possible.

Effective against pathogenic bacteria, fungi, and viruses (inc. Coronavirus)

Cleaning & decontamination of your premises will be carried out using best practice, using an effective combination of proven chemicals and **cleaning agents, room fogging** and specific **touch-point surface cleaning** techniques. The following reports will be supplied and documented against the appropriate standards.

Making Data Work for You

Opuz brings peace of mind to anyone responsible for the compliance management and environmental safety. Managing PPM workflow and reactive maintenance. [Find out more](#)

Following a free consultation with one of our qualified experts and a dynamic onsite risk assessment we will provide:

Fogging

This is a practical decontamination method, which supplements our more traditional spray and wipe method to ensure not only surfaces but the ambient air in any room is as infection-free as possible. Once the size of the room is calculated, parameters can be set on the machine and fogging can get underway Killing pathogenic bacteria, fungi, and viruses and leaving your premises as safe for use as possible.

Touch-point Surface Cleaning

We will focus on areas of high use, giving specific additional attention to the cleaning/decontamination of all regular touch-points in your building. All premises will be assessed on an individual basis but frequently touched surfaces are likely to include the following:

- Doorknobs, plates & handles
- Handrails
- Light switches
- Desktops & work surfaces
- Computer keyboards / Mouse
- Telephone equipment
- Chairs
- Sinks & kitchen surfaces
- Toilets Flushers
- Taps and Soap Dispensers
- Water fountains/Vending machines

Personal protective equipment

The safety of our staff is of utmost importance, PPE as specified by our RAMS and the risk assessment will be worn by operatives at all times, including full face covering masks, chemical resistant gloves, body suits and shoe covers as a minimum. Furthermore at least one operative is designated to observe and check the decontamination operative(s) for any signs of contamination throughout the task.

Waste - All physical waste from the cleaning process (gloves, overalls, clothes etc.) will be double bagged and labelled (SMS Task ID and Date). These will be stored safely and securely for 72 hours before being thrown away in a regular rubbish bin.
